Study Coach

Step 1/3

Built only from what you tell me. More topics and deadlines mean a more specific plan.

1 Tell me about the course

2 Confirm & refine

3 Your study plan

COURSE

Which class is this plan for?

Cell Biology

Organic Chemistry

Cognitive Psychology

Linear Algebra

Data Structures & Algorithms

Modern World History

Intro to PSYC

Digital marketing

YOUR GOAL

What does success look like to you? Be as specific as possible.

Understand the core concepts well enough to confidently explain them on the exam and score 85%+

TOPICS YOUR PROFESSOR EMPHASIZES

Chapters, concepts, or themes - only what you actually know from lectures or the syllabus.

e.g. Memory encoding, Cognitive biases, Research methods...

Add

Cell membrane structure and transport

Cellular respiration and ATP production

DNA replication and mutations

WHAT FEELS SOLID

Optional: topics you're comfortable with

Basic cell structure, Organelles and their functions, Diffusion and osmosis

WHAT YOU'RE STRUGGLING WITH

Optional: where I should spend extra time

Cell signaling pathways

Glycolysis and Krebs cycle steps

DNA replication enzymes

Struggle Tracker

Working with 3 topics and 1 date.

Plan confidence89%

Strong inputs. The plan will be specific to what you shared.

Only plans from what you tell me. No invented topics or dates.

UPCOMING DEADLINES

Exam, quiz, or project dates. The plan is anchored around these.

Exam Day

2026-05-18

+ Add another

COURSE MATERIALS

Syllabus, notes, readings - optional but makes everything sharper.

Drop files or click to upload

PDF, DOCX, PNG, JPG

STUDY DAYS / WEEK

1

2

3

4

5

6

7

30m

45m

60m

75m

90m

Include weekends

Schedule sessions on Saturday & Sunday too

HOW YOU LEARN BEST

Pick any that apply. The plan leans into these.

Active recall

Spaced repetition

Practice problems

Teaching others

Visual diagrams

Reading + notes

Flashcards

Watching lectures
